What happens next?

MISS DIG will notify member facility owners of the locate request and the member facility owners then have until the dig start date and time provided to you when you placed your request to complete locating of their facilities and post to positive response. No one needs to be present for the utilities to locate but they must have access to the property. Only public utilities will be located, no privately installed lines such as sprinkler systems, electric line from house to a garage or other out-buildings (unless the out-building has a meter on it), or water line from a well.

Positive Response - All facility owners are required to participate in the Positive Response program. This tool collects information from member facility owners as to the locating status of a ticket. Excavators and homeowners must check Positive Response prior to digging to verify if their ticket has been marked, is clear, or if utilities have yet to respond. This information is administered by MISS DIG and is available, with a ticket number, online at status.missdig.org or via automated phone system at 800-763-3888.

Hand Dig and Expose - If power equipment will be used within 48 inches of either side of a utility mark, whether paint or flag, the excavator shall first expose and verify the precise location of the marked line by soft excavation methods. "Soft excavation" means a method and technique designed to prevent contact damage to underground facilities, including, but not limited to, hand-digging, cautious digging with non-mechanical tools, vacuum excavation methods, or use of pneumatic hand tools. Once the line has been uncovered and the precise location of the line identified, the use of power equipment may commence.

Damage Prevention Association's/Education - MISS DIG personnel are available to meet with industry stakeholders and those looking to learn more about utility damage prevention in Michigan. MISS DIG conducts hundreds of training sessions and presentations each year. Typically, there is no fee to have a representative attend a safety event or host a training event at your location. In addition, MISS DIG participates in dozens of regional associations dedicated to promoting safety and the guidelines laid out in the State's MISS DIG Act, Public Act 174.

For a list of the associations, or to contact the MISS DIG field representative in your area, please visit missdig.org
